Manzi David

Software Engineering Student @ ALU

Kigali City, Rwanda

Summary

A dedicated software engineer adept in PHP and React JS, passionate about leveraging tech for societal solutions. Experienced in diverse projects from aiding students to impactful community-driven initiatives, embodying a commitment to innovation and social impact through technology.

Experience

Upwork

Freelance Software Engineer

November 2022 - Present (1 year 10 months)

Gasabo, Kigali City, Rwanda

As a freelancer on Upwork, I strive to deliver top-notch web development solutions by using a diverse set of tools and technologies. My expertise includes using Next.js for server-side rendering, PHP for backend development, and React for dynamic front-end experiences. This combination allows me to create highly responsive, scalable, and efficient web applications tailored to clients' needs, ensuring high-quality results and client satisfaction throughout my web development journey.

Thematic

Thematic Extern

May 2024 - July 2024 (3 months)

Culver City, California, United States

Identified and analyzed ideal customer personas, sourcing 10 high-potential leads, which increased targeted outreach efficiency by 30% and improved lead conversion rates. Developed and communicated Thematic's unique value proposition through tailored cold outreach, leading to a 25% higher engagement rate and generating significant interest from key prospects. Managed multiple projects independently within an asynchronous eight-week program, ensuring timely completion and maintaining high-quality standards, which enhanced overall productivity and project outcomes.

Mobalytics
Mobalytics Extern
March 2024 - May 2024 (3 months)
Santa Monica, California, USA

I thoroughly familiarized myself with Mobalytics' vision and operations, aligning my research with their strategic goals. Conducted an overview of 20 gaming genres, identifying key trends and emerging opportunities. Selected one genre for an in-depth analysis, examining game mechanics, KPIs, revenue models, and player psychology, which provided detailed insights. Engaged with 5 games within this genre to gather firsthand experience. Compiled findings into a presentation highlighting 10 key takeaways and offering 3 strategic recommendations for market expansion. This approach delivered actionable guidance, helping Mobalytics refine their market strategy and pinpoint growth opportunities, potentially enhancing their competitive edge by 25%.

NATCOM SERVICES RWANDA
Engineer Intern
June 2021 - July 2021 (2 months)
Nyarugenge District, Kigali City, Rwanda

As an intern, I developed essential skills in JavaScript, Java, and Python, significantly enhancing my proficiency in these core programming languages. This experience provided me with a strong foundation in coding and problem-solving, crucial for tackling complex technical challenges and contributing effectively to development projects.

BICT
Project Intern
April 2019 - November 2019 (8 months)
Nyarugenge District, Kigali City, Rwanda

During my internship, I acquired valuable skills in system analysis, interaction design, implementation, and web/mobile application development. I also learned the fundamentals of coding in JavaScript, HTML, and CSS, building a solid foundation in these technologies. This experience enhanced my ability to contribute effectively to various development projects and understand complex technical processes.
